COURSE DESCRIPTION								
Course/educational activity objectives Course/educational	The first main objective is to train students to understand the key determinants of the Croatian economy, and Croatian long-term economic developments, finally and in the context of the EU. Therefore, second main objective is to broaden students' understanding of the functioning of EU Economic Policies (their meaning, further development, and sustainability) on one side, and on the other side, to achieve competencies in judging business actions of the entities in the Member States under different EU Economic Policies.							
activity enrolment requirements and entry competences required	Introductory macroeconomics.							
Learning outcomes expected at the level of course/ educational activity (4 to 10 outcomes)	Overall learning outcome of the course: Analyze, identify and critically evaluate theoretical and practical aspects of the functioning of the Croatian economy, and analyze and critically judge the development, implementation, and effects of different EU Economic Policies on the development and competitiveness of EU Member States, as well as the relationships between entities in the Single European Market. Individual learning outcomes – students will be able to: - Critically judge the historical and political aspects of the development of EU integration and different economic policies. - Critically evaluate the consequences of economic policy through identified problems and interdependencies in the structure of the national economy. - Critically judge the consequences of economic policy and the activities of individual economic entities in the context of the national economy. - Identify the specifics of the Croatian economy in the international context.							

	Lectures		Seminars and Field work		
No.*	Topics	Hours	Topics	Hours	
1	Review of Croatian Economic Development Path in the last 100 years	2	International Relations and Foreign Direct Investment		
2	Privatization and transition to market economy	2	Industry and Industrial Policy	5 (F)

8	Fiscal Policy	2	Workshop and discussion on selected topics from the covered lectures	2	
9	Regional Policy	2	Workshop and discussion on selected topics from the covered lectures	2	
10	Health system	2	Workshop and discussion on selected topics from the covered lectures	2	

*One week of instruction includes 4 hours of lectures and 4 hours of exercises. The entire course takes place over 5 weeks.

Below is a general outline of the field work:

Visit Solin (one of the planned visits depending on availability):

- . AD Plastik Group: The leading company specializing in the development and production of interior and exterior car components in Croatia and one of the leading companies in Eastern Europe. With over 35 years of experience in the automotive industry, they manufacture for the world's most famous car makers. A multinational company with eight production sites in five countries. Established in 1992 as a spin-off from well know predecessor local socialist enterprise Jugoplastika (est. 1952, sponsor of the Jugoplastika basketball team champions of Europe 1990 with several players later in the NBA like Dino Radja, Toni Kukoč, and Žan Tabak).
- CEMEX Croatia: Since 1861 Dalmacijacement has been producing cement, and since 2008 it
 has been owned by the global CEMEX group. Once a pillar of local industrialization, now under
 the pressure of globalization, strengthening ecological standards and competing for space with
 tourism and housing.
- 3. **Salona Archeological Park:** The largest complex of ancient monuments in Croatia, will take you back to the time of the Roman Empire. A town of 60,000 inhabitants was the headquarters of the Roman province of Dalmatia. A walk through the Salona Archaeological Park takes you to the remains of a Roman amphitheater, city walls, and a forum with temples. How can such archeological sites balance interests of heritage preservation and economic valorization through tourism projects?

Visit island Brač (one of the planned visits depending on availability):

- Supetar: Waterman Svpetrvs Resort, Croatian-American businessman from Galveston Texas, and his Waterman International Inc. invested over 80 million USD and employ 600 people on the island Brač so they know the advantages and disadvantages of investing in Croatia
- 2. Postira: Sardina d.o.o. is a company that deals with fishing, processing, and preserving fish, and the cultivation of mariculture products at their breeding sites. With a 100-year tradition of conducting business (est. 1907), Sardina is one of the leading Croatian companies in the fishing and fish-processing sector and has a strong emphasis on the export of their products.
- 3. Pučišća: Stonemasonry school, with more than 110 years of tradition is the only school that educates future masters of stonemasonry by using ancient Roman hand tools in the teaching and learning process in this part of Europe. Jadrankamen d.d. est. 1902 exploits excavation sites of white limeston in use from ancient times. With this limestone was built the Diocletian palace, Cathedral in Šibenik, Parlaments in Weinna and Budapest (allegedly it was used in White House renovations in 1902).
